### **ProStor Systems' New InfiniVault Archive Appliance Now Supported by Quest Software's Archive Manager**

**BOULDER, Colo.** – Oct. 15, 2007 – ProStor Systems, a leading developer of removable disk storage solutions, today announced that Quest Software, Inc.'s (Nasdaq: QSFT) Archive Manager product now supports ProStor's InfiniVault™ archive appliance, the world's first removable disk archive appliance for the enterprise, creating a unified, complementary storage solution for enterprise customers. Quest becomes the latest third-party software vendor to add InfiniVault compatibility to its features list, giving the company an innovative, scalable storage platform to host its applications.

ProStor's InfiniVault provides an unbeatable digital archive and compliance solution that reduces storage costs by combining long-term data retention, regulatory compliance, automated data archiving and disaster recovery protection in a single, simple-to-deploy and easy-to-use appliance. By leveraging RDX® removable disk technology, ProStor has created the world's first archive system that combines the performance and rapid retrieval of conventional hard disk drives with the unlimited capacity scalability and disaster recovery protection of removable media but with a system design that is far more reliable than tape and much lower cost than fixed-disk archive systems.

## **ProStor's InfiniVault Supported by Quest Software**

“We’re pleased to have Quest Software as our latest ISV partner. As a leader in email archiving, Quest has a proven track record of providing optimal storage solutions for enterprise IT,” said Steve Georgis, President and CEO of ProStor Systems. “Quest Archive Manager’s support of our all-disk InfiniVault archive appliance helps address the challenges of compliance and storage management, and provides enterprise customers with a total enterprise-class storage solution.”

“Our customers benefit from integrated solutions that combine added-value hardware products from elite partners with Quest’s software expertise, so our support of ProStor’s new InfiniVault was an easy decision to make,” said Peter terSteege, Archiving Technical Director for Quest Software. “When Archive Manager is coupled with InfiniVault, enterprises have the security of knowing that their mission-critical data is safely protected and enabled to meet even the strictest compliance regulations.”

The InfiniVault product suite is available in three configurations designed to fit in various small and midsized enterprises:

- The InfiniVault Model 3 is designed for small businesses and remote offices. The Model 3 archive appliance is an integrated tower system with up to 1.6 TB of online and nearline storage and infinite offline capacity;

- The InfiniVault Model 30 is designed for small to medium enterprises that need a flexible, cost-effective archive solution. The Model 30 archive appliance is an integrated rack-mount system with up to 11 TB of online and nearline storage and infinite offline capacity;

- The InfiniVault Model 100 is designed for midsized enterprises that need a flexible archive solution that can store large amounts of archive data online. The Model 100 archive appliance is an integrated rack-mount system with up to 39 TB of online and nearline storage and infinite offline capacity.
